

Cougar Drilling Jars - Model Comparison

DJ6

Hydraulic Mechanical

Cougar proprietary internal mechanical latch

DJ10

Double Acting Hydra-Mechanical

Cougar proprietary internal mechanical latch

DJ12

Double Acting Hydraulic

No internal mechanical latch

FEATURES AND BENEFITS

- Proprietary internal latch prevents jar from misfiring downhole while tripping
- No need for an external safety clamp on surface
- Ability to reset latch and return to drilling without pulling out of the hole
- Fully sealed, lubricated for longer service life
- Suitable for fishing operations

- Proprietary internal latch prevents jar from misfiring downhole while tripping
- No need for an external safety clamp on surface
- Ideal for directional, horizontal and deep hole applications
- Ability to reset latch and return to drilling without pulling out of the hole
- Fully sealed, lubricated for longer service life
